

رواد مصر الرقمية - DEPI

Assignment 1: 30-Day Career Action Plan

Student Name: Amr Reda Mohamed
Group Code: QAL5_SWD2_S1
Target Role: React Frontend Developer
Skill to Improve: React.js Component Architecture & State Management

Week	Action	Evidence / Result
Week 1	Study React component fundamentals and setup a new project environment.	GitHub repository link containing a responsive single-page layout using isolated React components.
Week 2	Implement state management and modern hooks (useState, useEffect) to manage UI state.	Interactive UI features functioning correctly, such as dynamic lists or state-driven menus.
Week 3	Integrate the React frontend with a RESTful API (e.g., a Laravel backend endpoint) to fetch data.	Successful API data retrieval and rendering on the page, evidenced by working frontend data mapping.
Week 4	Prepare the build and deploy the React application to a live hosting service.	Live URL of the deployed React application (e.g., via Vercel or Netlify) added to the portfolio.
